Reviews

This publication is indeed gripping and intriguing. It is actually written in basic terms and not difficult to understand. I am just pleased to explain how here is the greatest publication we have read through during my own lifestyle and could be the best pdf for at any time.

iUniverse, United States, 2010. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.During the 1950s, the United States and the Soviet Union teetered on the brink of nuclear devastation. America's hope for national security relied solely upon aerial reconnaissance. Radar Man is the fascinating memoir of a physicist who, with his colleagues, developed the stealth technology that eventually created radar-invisible aircraft. Edward Lovick shares a compelling story from the perspective of an enthusiastic scientist that highlights his pioneering experiences in an innovative, secret world as he helped create stealth aircraft such as the A-12 OXCART, SR-71 Blackbird, and F-117 Nighthawk. From the moment in 1957 when Lockheed's famous aircraft designer Clarence L. Kelly Johnson invited Lovick to join his Skunk Works, Lovick details how he helped the CIA eventually perform vital, covert reconnaissance flights over Soviet-held territory during the Cold War, saved Lockheed ADP's A-12 from cancellation, and provided key design input to the SR-71 and F-117. Lovick's autobiography describing his career as an engineering physicist in the Skunk Works not only draws attention to the insurmountable challenges that accompanied the task of developing radar-invisible aircraft, but also the importance of the monumental task these young scientists fulfilled—all with the hope of creating a secure future for their beloved country.
