Taylor Francis Inc, United States, 1992. Hardback. Condition: New. Language: English . Brand New Book. This overview of drug abuse epidemiology provides the necessary information to approach the first step in solving the drug abuse problem - describing and identifying all the elements that contribute to it. These accounts of drug abuse epidemiology should help to guide drug abuse researchers, public health experts, and social scientists to gather and evaluate the critical drug abuse information they need for the particular population they serve. Contributors offer practical advice regarding what works in drug abuse epidemiology, what doesn't work, and the reasons why. First-hand knowledge on ethnographic strategies, surveillance techniques, and practical approaches for professionals, previously with few resources and little expertise, should keep them on the cutting edge in this field. What Works in Drug Abuse Epidemiology offers a variety of examples of epidemiological efforts nationally and internationally are presented, demonstrating the adaptability of methods under the varying cultural and political climates of the United States, Mexico, Great Britain and European countries. Chapters are included which offer strategies for studying hard-to-reach populations that are especially at risk, specifically black youth living in ghettos and homeless people in public shelters. Particularly useful to professionals developing epidemiological strategies are discussions of creative, nontraditional studies for such problems as designer drugs, and drug use on the streets of New York City which are designed to assist drug abuse epidemiologists in developing strategies to get at the heart of their own specific drug abuse problems.
