

## Transforming Data and Metadata Into Actionable Intelligence and Information Within the Maritime Domain (Paperback)

By Naval Postgraduate School

Createspace, United States, 2014. Paperback. Condition: New. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*. At present, the Navy is unable to provide a robust, routable network that provides real-time actionable intelligence between boarding operations and intelligence analysts. Actionable intelligence is the means of obtaining concrete knowledge that permits an individual to take action based on known information. The lack of a robust routable network creates a lag in operational responsiveness to potential threats identified within the Maritime Environment. In response to current shortfalls, improved Extended Maritime Interdiction Operations (EMIO) seeks to support the Secretary of the Navy's vision to streamline and improve operations and exploitation of boarding data. However, there has been no clear indication as to how the implementation of these technologies will affect command and control or current operations. This book examines the impact of improved EMIO technology designed to bridge together data with intelligence collected during EMIO and improve maritime domain decision making in terms of speed and quality and thus improve end user's situational awareness. We follow the construct of Business Process Reengineering (BPR) to frame our analysis and to provide focus in our data collection. We also examine the...
