Forgotten Books, 2018. Hardback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Effects of Moisture Added at Lint Slide on Lint Quality and Bale Weight in Humid Cotton-Growing Areas The second moisture differential is that between the existing lint moisture content at the bale surface and the equilibrium moisture content at prevailing atmospheric conditions. The different effects on the six test bales of the various combinations of factors from October 14 to November 12, 1954, may be observed (see fig. These bales were exposed simultaneously to the same relative-humidity changes, yet the degree and rate of change among them differed, as is indicated by the slopes of the curves. Similarity in slopes of all the curves after November 12, as well as their similarity to the relative-humidity line, indicates that the moisture differential between the surface and the center of each bale was less than the difference between the surface moisture content and the equilibrium moisture content. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
