It consists of 20 carefully selected surveys and research-expository papers. Their scope gives a representative status report on the field drawing a picture of a rapidly developing domain of analysis. An abundance of references completes the picture. All papers included in the volume originate from lectures delivered at the 11th edition of the International Workshop on Operator Theory and its Applications (IWOTA-2000, June 13-16, Bordeaux). Some information about the conference, including the complete list of participants, can be found on forthcoming pages. The editors are indebted to A.
