Brand New Book ***** Print on Demand *****.Excerpt from A Text-Book of Mathematics and Mechanics Specially Arranged for the Use of Students Qualifying for Science and Technical Examinations: With Numerous Diagramms and Worked-Out Examples The present work has been compiled with the object of assisting candidates for scientific and higher technical examinations. But little difficulty is experienced in the teaching of engineering subjects to students who have already a sound knowledge of mathematics. Unfortunately, however, the engineering student in Great Britain lags behind his Continental colleague in regard to the interest he takes in mathematics. An engineer who desires to economise his time should, first of all, acquire a thorough knowledge of the elements of the calculus. To omit to do so is to find out, when too late, that he is improperly equipped for his work. In the present volume it has been assumed that the student has already acquired a thorough knowledge of algebra, including logarithmic series, and of plane trigonometry, including the solution of triangles. He is also assumed to have the usual acquaintance with geometry and elementary mechanics necessary to a proper understanding of the higher branches of the subjects. The author has had experience in the teaching of mathematics in this country, extending since 1880, having acted as an assistant to the late Professor W. E. Ayrton, F.R.S., in the City and Guilds of London Institute. He has, therefore, been more than a mere spectator, and ho has been struck by the low standard of mathematical knowledge which is deemed necessary for entrance to Technical Institutions, and by the indifference which is shown by many British engineers to the value of a sound knowledge of mathematics as a preliminary...
